Political disclaimer

The views, opinions, arguments and recommendations presented in this Suggestion to the redistribution of electoral divisions of Queensland are my own and in no way reflect the views of my employer Services Australia, the Australian Public Service or the Australian Government.

My right to hold and express views as an Australian Citizen is [protected under Australian law](#).

Exercising this right to participate in public and political debate by lodging this public Suggestion in no way affects my capacity to fulfill my duties in a professional, impartial, and apolitical manner.

This submission complies with conditions of employment in the Australian Public Service (APS) in accordance with the *Public Service Act 1999*, the [APS Values, Code of Conduct and Employment Principles](#), Services Australia's [Social Media Policy for agency staff](#), and [Social media: Guidance for Australian Public Service Employees and Agencies](#)

I hold no interest in, and do not stand to receive any benefit or advantage resulting from the outcome of this redistribution. I have written this Suggestion as a private citizen taking a personal interest in psephology and the electoral redistribution process. I am not now, nor at any time in the past been a member of any political party or similar associated organisation.

This Suggestion is lodged claiming political neutrality. No political bias or partiality is implied within this submission and none should be inferred. This submission is lodged in accordance with [guidelines for making public submissions to a redistribution](#). The political implications – if any – of the recommendations have not formed part of the recommendation and should not be inferred.

Division names – including any suggested new names– comply with [guidelines for naming federal electoral divisions](#). Suggested names are based on the individual's merit and contribution to Australian society, and do not imply any political bias towards the eponymous persons. Proposals to abolish or rename a division – if any – do not reflect the performance or character of the current member of Parliament representing that division or, unless specified, the eponymous person.

Criticism of submissions or decisions taken as part of this redistribution is based solely on the merit of the arguments and recommendations presented therein and serves solely to improve electoral representation for the people of Queensland. It is not in any way a reflection upon the character or abilities of any individual, government entity, community group, or organisation participating in this process, nor any member of a Redistribution Committee, augmented Electoral Commission, any other member of the Australian Electoral Commission, Australian Public Service, any other Australian Government entity, agency, department or any current or past member of Parliament.

Synopsis

This is a written suggestion under subsection 64(1)(a) of the *Commonwealth Electoral Act 1918* for the redistribution of Queensland. This suggestion covers both the names and boundaries of all divisions within Queensland and outlines my approach to the redistribution process.

Proposed boundaries in this Suggestion can be viewed online at: <https://divs.au/qld/>

I favour using the full threshold, rather than clustering divisions tightly around the quota. This allows flexibility to respect community boundaries and produce more coherent divisions, even if some seats are closer to the edge of the range.

On methodology, I emphasise that boundaries should be drawn with clarity and logic: divisions should be coherent, and respect community of interests, but with the understanding that perfect alignment with local government or communities is rarely possible. Practically, transport links, and natural geography should guide final choices.

In determining the division boundaries and names, I consider the [Guidelines for making public submissions to a redistribution](#) and the [Guidelines for naming federal electoral divisions](#). I apply principles in relation to increasing diversity of representation if names of divisions are to be created, renamed or retired. Names of divisions reflecting colonial-era individuals and geographic features should be retired when appropriate and new division names that reflect our diverse, contemporary society should be adopted.

I propose a small exchange between **LEICHHARDT** and **KENNEDY, HERBERT** takes Annandale, **DAWSON** takes the remainder of Burdekin, Whitsunday and most of Mackay, while **CAPRICORNIA** takes all of Rockhampton and extends to include Banana and part of North Burnett. Emerald and Clermont transfer to **MARANOA**. **FLYNN** contracts to the coastal Gladstone–Bundaberg area, with **HINKLER** extending south to take in Maryborough, Cooloola, Kilkivan and Gayndah. **GROOM** expands into Maranoa around Crows Nest, and the Lockyer Valley transfers from **WRIGHT** into **BLAIR**.

On the Sunshine Coast, **WIDE BAY** retains the Gympie section and extends south taking in the hinterland west of the Bruce Highway, including the Woodford–D'Aguilar area and the whole of Somerset. Adjustments through northern Brisbane cascade from north to south: **RYAN** picks up Everton Park, Everton Hills and Karana Downs; **PETRIE** retreats to the Pine River, with **DICKSON** and **LILLEY** absorbing the area to its south, taking Narangba from **LONGMAN**. South of the river, **OXLEY** moves further into Ipswich, taking Collingwood Park, Redbank Plains, Springfield and part of Ripley, while shedding to the north, allowing **MORETON**, **GRIFFITH**, **BONNER**, **RANKIN** and **FORDE** to expand naturally. On the Gold Coast, **WRIGHT** gains Pacific Pines, Oxenford and part of Nerang, while giving up the bulk of Mudgeeraba to **McPHERSON**.

I propose that the name **WIDE BAY** be retired, with the new Sunshine Coast hinterland and Somerset division named **CLEARY**, in honour of Honor Dell Cleary.

Introduction

About this suggestion

A redistribution under subsection 59(2)(c) of the *Commonwealth Electoral Act 1918* (The Electoral Act) was scheduled to commence 15 November 2024 marking seven years since the last redistribution of Queensland. This redistribution was deferred in accordance with subsection 59(4) as the scheduled commencement date was within 12 months of the expiry of parliament. The deferred redistribution was subsequently deferred a second time, in accordance with subsection 59(5) as the Electoral Commission were of the opinion that the upcoming determination may change the number of members to which Queensland was entitled. The entitlement determination occurred on 23 July 2026 and determined that Queensland continued to be entitled to 30 divisions. The Redistribution of Queensland officially commenced on 28 July 2026.

Redistributions provide an essential opportunity to review and refine the boundaries of the existing electoral divisions. In doing so, attention must be paid to subsection 66(3) of the Electoral Act. While subsection 66(3)(a) requires numerical equality among enrolled electors, subsection 66 (3)(b) directs the Redistribution Committee to consider matters of community of interests, including economic, social and regional factors as well as means of communication and travel.

Although redistributions often begin with a presumption of favour of maintaining existing boundaries, it is important to recognise that those boundaries were frequently the result of compromises made under the constraints of past enrolment data. As such, existing boundaries should not be assumed to represent preferred or ideal outcomes. In many cases, known deficiencies persist due to the difficulty of resolving them within numerical tolerances. These recurring weaknesses highlight the importance of approaching each redistribution with a fresh and critical evaluation of how well current boundaries serve their intended purpose.

Enrolment data

In order to comply with the numerical requirements of The Electoral Act, the number of electors enrolled in each division must not vary by more than 10 per cent from the redistribution quota. The Electoral Commissioner has determined the redistribution quota for Queensland on 28 July 2026 to be 127,259 electors. This means that no division can contain more than 139,984 or less than 114,534 electors.

The projected number of electors must be within 3.5 per cent of the projected quota of 132,526 on the projection date of 27 August 2028, meaning divisions must contain between 127,888 and 137,164 electors. Under subsections 66(3)(a) and 66(3)(b) of The Electoral Act, the numerical threshold for the current quota is the only mandatory criterion. Even the projected threshold is described as “as far as practicable” meaning there may be leeway to the figures. However, that measure has always been practicable and has therefore never been breached.

Methodology

Determining boundaries

In drafting this suggestion, I have sought to comply with the criteria set out in subsection 66(3)(b) of the Electoral Act, taking into account:

- i. community of interests, including economic, social and regional interests;
- ii. means of communication and travel;
- iv. the physical features and area; and
- v. the boundaries of existing divisions within the State.

Where possible, I aim to use clear and recognisable boundaries to ensure that electors can readily identify the division in which they live. I will split SA1 areas where a geographic feature makes for a more logical division boundary. In cases where split SA1 elector data is not available, I make a reasoned judgement as to the likely distribution of electors. The Committee will, of course, have access to more precise data to ensure compliance with numerical requirements. However, in these situations, I aim to ensure that either division could afford to contain the entire SA1 population within the numerical threshold.

In pursuit of improved community of interests representation, I make use of the full numerical threshold under subsection 66(3)(a), recognising that this threshold exists for a reason. I believe the reason for an allowance is to facilitate better alignment with community of interests. I therefore may draw divisions close to the permissible upper or lower enrolment threshold to achieve the best community of interests outcome.

Unless otherwise stated, references to elector numbers in this Suggestion refer to projected enrolment figures, as these are generally the stricter constraint under the Electoral Act and are the relevant measure for long-term compliance.

My approach follows a cascading process, beginning with an anchor division – usually located in a corner of the state or an area with limited capacity to expand. From this starting point, I work across the state, adjusting neighbouring divisions in a sequential and logical pattern.

Boundary of existing divisions

I use the boundaries of the existing divisions as building blocks in this suggestion. However, in doing so, I note that subsection 66(3A) of the Electoral Act, the existing boundaries must be considered as subordinate to the other criteria in subsection 66(3). Therefore, existing boundaries must yield where they divide a community that could otherwise be united within the numerical tolerances.

Community of interests

Community of interests is a broad and often contested concept. In practice, it refers to groups of electors who share access to similar services and amenities, participate in the same social and cultural networks, share demographic characteristics, or identify with a common place or identity. It is rare for an electoral division to represent just one single, homogeneous

community. Almost all divisions will contain multiple, interconnected communities that function together. Often this operates a spectrum where communities on either end of the division do not consider themselves to be united, but through the continuity of the communities between they do indeed share similarities.

Local government areas can be a useful indicator of communities of interests, particularly in rural and regional areas, where several townships often share services and economic activity. However, in metropolitan areas, local government tends to be less reliable as an indicator of community cohesion. Boundaries may reflect outdated administrative arrangements, or recent cost-cutting amalgamations, that do not correspond with contemporary lived communities. Accordingly, I am more willing to divide local government areas in urban contexts where other factors and boundaries result in more coherent representation of community. Within Queensland, the City of Brisbane dominates much of the metropolitan landscape, effectively eliminating alignment along local government areas for much of the city.

Suburb or locality boundaries, while sometimes arbitrarily or inconsistently defined, have been used by previous Committees and are commonly understood and familiar to electors. They can be useful in both metropolitan and regional areas, particularly where no other clear geographic boundary exists in the area.

Communication and travel

Means of communication and travel are fundamental to determining effective and representative boundaries. Communities connected by major roads, public transport corridors, or shared infrastructure are more likely to function cohesively. Where separate communities must be included with the same division this should occur along these corridors where possible.

While major roads, highways or railways are be used as boundaries to a great extent, care must be taken to ensure that a boundary is not drawn down a road or railway that results in inadvertently splitting otherwise united communities. More common in rural areas, sometimes a railway station or major road will become a community hub with electors and residents from either side accessing the facilities.

Crucially, divisions should never be drawn in a way that makes them only contiguous on a map. A boundary that results in two parts of a division being physically separated by impassable terrain, such as forests, ridges, un-spanned waterways or undeveloped bushland, may satisfy technical contiguity, but fails the practical test of means of communication and travel. Electors in such areas may feel disconnected, not only from one another, but from their elected representative. This risk should be avoided wherever possible, even at the expense of greater numerical neatness.

Physical features and area

Natural geographic features can help define logical and effective electoral divisions. Rivers, ridgelines, reserves and open space corridors can serve as both practical boundaries and symbolic dividers of community identity, particularly where they also limit communication or development.

Where such features serve as real-world barriers to movement, access or interaction, they should be used to inform electoral boundaries. However, much like roads and railways, it's equally important to avoid using these features where they act as shared connectors, such as riverfront precincts, lakeside parks or transport corridors along valley floors.

Political fairness

This Suggestion has been written in a manner that is wholly impartial. I have not considered the political implications of any boundary changes, attempted to analyse voting patterns or booth-level results, nor tried to balance the number of divisions between parties. This is consistent with the intent and structure of section 66 of the Electoral Act, which in my view deliberately omits any reference to political outcomes or representation.

Fairness in this context means neutrality. Boundaries should be drawn only with regard to the criteria spelt out in the Electoral Act and the needs of electors, not to the political consequences for parties or candidates. Electoral boundaries should reflect people and communities, not polls and politics.

Drawing the line

Ultimately every redistribution must draw boundaries, and those boundaries will necessarily divide some communities. It is an unavoidable consequence of the task. There will always be electors who feel they belong more with those just across the street or creek than with others further away in their own division.

When determining boundaries, I seek to minimise those cases but recognise they cannot be eliminated entirely. My goal is to ensure that, when a line must be drawn it is done so logically, transparently, and with the greatest possible regard to the criteria of subsection 66(3).

Division Names

Honouring Australians with division names

While noting the proposed boundaries and electoral representation is the main objective in a redistribution process, it must be acknowledged that redistributions are more than a technical exercise in numbers and cartography. Indeed, the most contentious parts of recent redistributions has been proposed names for new divisions, or which divisions are proposed to be abolished.

Redistributions are opportunities to revisit who we choose to honour as a nation. Federal division names are long-lived, visible, and symbolic. They communicate values about the individuals and events that a society considers worthy of recognition. They should reflect people whose contributions were nationally significant and enduring, not merely historical.

According to the [Guidelines for naming federal electoral divisions](#), divisions should, in the main, be named after deceased Australians who have rendered outstanding service to their community. This provides a clear framework, but each redistribution allows us to apply it with attention to contemporary standards of fairness, diversity, and relevance. Naming is a reflection of societal priorities at the time.

Divisions named for colonial-era persons

Not surprisingly, an inordinately large number of divisions are named after colonial-era figures: politicians, governors, explorers, settlers and pioneers, including many of whom would not have identified as Australian themselves, and whose continued recognition today is, at best, obsolete, and at worst, problematic.

Many of these individuals are already extensively commemorated in other ways: their names grace local government areas, suburbs, roads, highways, geographic features, military installations, universities, banks, hospitals, airports, parks, public buildings, and monuments. It is not uncommon for the names of some individuals, such as Lachlan Macquarie, James Cook, Charles La Trobe, John Hindmarsh, George Bass, John Oxley or John Forrest, to appear across vast categories of public recognition. The need to also preserve their names via federal electoral divisions should be seen as low priority.

While these figures gave some contribution to the foundations of Australia, many identified primarily as British and spent only a portion of their lives here, often returning to their homeland to retire, or to continue exploration elsewhere. For example,

- John Franklin, after serving his time as Governor of Van Diemen's Land, embarked on extensive exploration of Canada and the Arctic.
- George Grey served as Governor of Cape Colony and New Zealand.
- Robert Herbet had an extensive career in various secretarial roles in the United Kingdom.

Their legacy is, therefore, tied to the British Empire rather than Australia specifically, and their continued prominence overlooks more diverse, contemporary individuals who identify and are recognised as Australians who have made significant contributions. Redistributions are an opportunity to address that imbalance.

More seriously, in other cases a division is named for a colonial-era person, when new evidence or information places the behaviour or actions of the person into question. In cases where the individual's actions are problematic, the name should be revoked and a new, more appropriate name should be assigned at the first opportunity. This approach has precedent. The renaming of **BATMAN**, **McMILLAN**, **WAKEFIELD** and **DENISON**, and the abolition of **STIRLING** followed community concern about the legacy of the individual.

Where division names are considered for abolition or retirement, the first candidates should be those named for colonial-era men, particularly where the individual identified primarily as British rather than Australian, already has received substantial public commemoration, or has a record of conduct now understood to be unworthy of public honour. New divisions should be ideally recognising contemporary Australians, including women, Indigenous Australians, or people of diverse backgrounds who have made significant national contributions.

Divisions named for geographic features

Divisions named after towns, suburbs, rivers, lakes, mountains, or other geographic features present their own challenges. Large divisions frequently encompass multiple, distinct communities, making it difficult for a single geographic feature to resonate across the entire electorate. Naming a division after a single feature may fail to connect with residents at the periphery, particularly in expansive rural divisions, where most electors hold no connection to the feature.

Some use Aboriginal words that may not reflect local First Nations languages or are the result of mistranslations. The fact that a name is of Indigenous origin should not exempt it from review. The exceptions are rare. Where a division's name is an authentic Indigenous place name that exists alongside an English alternative, such as **CALARE**, **INDI** or **WERRIWA**, there may be a stronger case for retention, even if the feature is no longer inside the boundaries.

Geographic names also replicate across other layers of government; state electorates, local council wards, and municipal designations frequently use the same or similar names, creating confusion. For example, the name **PARRAMATTA** applies not only the suburb and federal division, but a state division, the local government area, and a ward within council, yet none of the boundaries align. Residents in parts of Parramatta, Seven Hills, Epping, North Rocks, and Newington find themselves inconsistently associated with the name, depending on the level of government, undermining clarity and identification.

Electoral division boundaries, by their very nature, shift over time, disconnecting geographic divisions from their eponymous feature. **CORANGAMITE**, **McPHERSON**, **RICHMOND** and famously,

WERRIWA have all drifted away from the geographic references for which they were named. In other cases, such as **PARRAMATTA** or **WIDE BAY**, the division remains rigidly anchored to the feature, constraining adjustments to better represent communities of interest.

The Augmented Redistribution Committee for Western Australia noted regarding objections to the name **BULLWINKEL**:

“...in any event, a connection between an electoral division name and the electoral division itself may change over time, as boundaries shift over the course of redistributions.”

While this was in reference to naming a division for a person born inside the boundaries of the proposed division, this principle is even more true for geographic divisions.

Divisions names **BRISBANE**, **PERTH** or **CANBERRA** make some sense being named for a capital city. However more specific geographic-based divisions such as **NEWCASTLE**, **FREMANTLE**, **MARIBYRNONG**, or **WIDE BAY**, should be available for retirement at every redistribution. At minimum, divisions should be drawn without regard to the eponymous feature and subsequently renamed if the feature then falls outside the boundaries of the new division.

Divisions named for prominent people is a rare approach in electoral division naming conventions throughout the world. Most jurisdictions globally apply simple or compound geographic names or merely number districts. Australia, however, has a rich history of honouring prominent Australians, oftentimes those who might otherwise go unrecognised in their achievements, but retaining outdated geographic names can limit this practice.

Federation divisions

The guidelines recommend preserving the names of federation divisions where practicable. That principle has some notion of romanticism, but overall it's not a tenable long-term provision.

The pressing need for increased diversity in division names, along with assigning additional divisions to future prime ministers means that unless parliament increases the number of seats, and therefore divisions, the list of suitable candidates to retire, rename or abolish is constantly shrinking. In the main, suitable candidates to rename or retire should come from divisions named for either colonial-era persons or geographic areas and it is not a coincidence that most federation divisions fall into these two categories.

There are officially 65 federation divisions remaining, however, the actual number of divisions that have persisted intact since Federation is fewer. The divisions of **PARKES** and **OXLEY** are not true federation divisions, having replaced earlier divisions in other geographic areas, remaining abolished for several years before being reassigned at later redistributions. The division of **RIVERINA** was renamed **RIVERINA-DARLING** for nine years, before being renamed **RIVERINA** again, and therefore is also not a true federation division.

Previous Redistribution Committees have sought to abolish federation divisions where it is practical, with **GWYDIR**, **KALGOORLIE**, **MELBOURNE PORTS**, and **NORTH SYDNEY** being renamed or abolished, while **DENISON**, **WAKEFIELD**, and now **GREY**, also sometimes considered to be federation divisions, being renamed. In past proposed redistributions reports both **CORANGAMITE** and **FRANKLIN** were proposed to be retired before the Augmented Committess declined to make the changes.

Retention of federation divisions is largely nostalgic and has limited relevance in contemporary Australia. I will continue to advocate for renaming or retiring federation names where appropriate, prioritising names that reflect national significance, contemporary contributions, and diversity over historical sentiment or tradition.

Division names in Queensland

Three divisions in Queensland are named for Prime Ministers, **FADDEN**, **FISHER** and **FORDE**. The only other Prime Minister from Queensland, Rudd, is still living and therefore, there is no chance that a division would be named in his honour at this time. Two divisions, **BLAIR** and **BONNER** are named for indigenous people, while five divisions, **FAIRFAX**, **LONGMAN**, **MONCRIEFF**, **RANKIN** and **WRIGHT** are named for women.

GRIFFITH is named after a High Court judge and father of federation. **GROOM** and **RYAN** are named after federal politicians, while **FLYNN** and **HINKLER** are named after aviators with local connections to the areas.

Of the remaining divisions, six are entirely geographic (**BRISBANE**, **CAPRICORNIA**, **MARANOA**, **MCPHERSON**, **MORETON**, **WIDE BAY**), with five of those six (all but **MCPHERSON**) being federation division names. Both **MCPHERSON** and **MORETON** have drifted from their eponymous geographic features, likewise divisions named after individuals with a geographic presence, **HERBERT** and **PETRIE** have drifted from the geographic feature bearing the same name, while **OXLEY** tenuously holds onto the creek and suburb bearing its name.

The divisions named after colonial explorers, military officers and politicians includes **BOWMAN**, **DAWSON**, **HERBERT**, **KENNEDY**, **LEICHHARDT**, **LILLEY**, **OXLEY**, and **PETRIE**.

Divisions proposed to be abolished or renamed

Under the configuration I have proposed, the division currently named **WIDE BAY** would relocate inland, extending from Gympie through the Sunshine Coast hinterland to Nambour and into the Somerset region. As this division would no longer adjoin or serve the Wide Bay area for which it is named, that name would become irrelevant to the division it describes. Wide Bay is not, in any case, a geographic feature of notable distinction or prominence, and its retention as a division name carries little value once severed from the area it identifies.

I propose that the name **WIDE BAY** be retired. This would give the Commission greater flexibility in naming divisions across the wider Sunshine Coast, Fraser Coast and Burnett regions.

Should the Commission prefer not to alter any existing division names, I propose the following alternative sequence of renames, which preserves the use of all three names:

- The division I have proposed as **FLYNN**, comprising Gladstone and Bundaberg, be renamed **HINKLER**.
- The division I have proposed as **HINKLER**, comprising Hervey Bay, Maryborough and Cooloola, be renamed **WIDE BAY**.
- The new division comprising Gympie, Nambour and Somerset be named **FLYNN**.

I propose that:

The division name of **WIDE BAY** be retired.

Suggestion for new division names

I suggest a new division be created named **CLEARY** in honour of Honor Dell Cleary OAM¹, a Koa woman, educator, community leader and advocate for Aboriginal and Torres Strait Islander people.

Born and raised at Cherbourg in 1938, Cleary devoted her career to improving educational opportunities and outcomes for Indigenous children and families. She worked for more than 25 years at Yelangi Aboriginal and Torres Strait Islander Preschool and was instrumental in establishing Indigenous playgroups across Queensland. Her work extends beyond childhood education into health, housing and broader community development.

Cleary was a respected advocate and adviser on issues affecting Aboriginal communities. Her work was grounded in practical community service, with a particular emphasis of providing Indigenous children with stronger educational foundations and supporting families and communities. She was a Board Member of the Moreton Regional Elders Committee and served as an Elder with the Murri Court. She was a founding member of the Bunyabilla Aboriginal Corporation in Lawnton, and in 2018 a social housing complex at Lawnton was named in her honour².

Her contributions were recognised in 2000, when she was awarded the Medal of the Order of Australia for service to Aboriginal communities in Cherbourg and Brisbane. She was awarded the Centenary Medal in 2001. She received an honorary doctorate from Central Queensland University in 2013. She died in 2022 and was posthumously recognised as a Queensland Great in 2023.

I propose that:

A division named **CLEARY** be created to commemorate Honor Dell Cleary OAM (12 February 1938 – 12 November 2022).

Analysis of existing divisions

Geographic arrangement of divisions

The current divisions within Queensland are constrained mostly by numbers, with only few areas restricted by geography. Many geographic restrictions are historical convention rather than strict geography.

The most obvious issue in Queensland is the split of almost all major centres along the coast. Cairns, Townsville, Mackay, Rockhampton, and Bundaberg are all split in unsatisfactory manner. This could have been alleviated somewhat had the suggestions of **KENDEY** expanding to take in Cape York been accepted. The cascading effect this would have had on subsequent divisions would have allowed most centres to be placed wholly within a division. Alas, it was not done and the split persists.

We have an additional issue with **WRIGHT** consisting of not just the Scenic Rim and Gold Coast hinterland, but the addition of the Lockyer Valley attached with no communication through the division.

My proposal will look to fix both these issues. The main geographic feature used as a long standing and readily identifiable border is the Brisbane River. In general, most divisions within Brisbane metropolitan area tend to be either north or south of the river. Otherwise, it is a case of balancing the thresholds with a current uneven split of divisions. Except for **HINKLER**, all the regional and rural divisions are below quota and will need to gain electors. This will create a cascading effect meaning the rural divisions will need to encroach into the south-east regions. The outer suburban areas form an over-threshold ring around the main Brisbane area, with **WRIGHT**, **BLAIR**, **LONGMAN**, and **FISHER** all projected to be more than fifteen percent over the threshold. This area will be the primary region to absorb the expansion from the rural regions. Likewise, it will probably need to absorb some of the inner suburbs, with most of the central Brisbane area also under threshold. I believe my proposal achieves all these joint requirements elegantly.

Suggested divisions

I generally start a redistribution at a corner of the state and expand outward. I have approached this redistribution the same way, working outward in stages so that each change creates the room needed for the next. I present my suggestions in three regions: rural and regional Queensland, the Sunshine Coast and northern Brisbane, and southern Brisbane and the Gold Coast.

Rural and regional Queensland

LEICHHARDT and **KENNEDY** are both within threshold and could be left unchanged. However, to create room for further changes further south, I make a small exchange between them. Bentley Park moves from **KENNEDY** into **LEICHHARDT**. This takes **LEICHHARDT** over threshold, so a small part of Kuranda moves the other way to bring **LEICHHARDT** back within threshold. This

then allows electors to cascade with **HERBERT** giving up the Northern Beaches area to **KENNEDY**, and allows **HERBERT** to expand and take in Annandale, while Wulguru goes to Kennedy. **DAWSON** then moves mostly out of Townsville urban area, with just the section east of Stuart Drive, and then other exchanges in Townsville South.

DAWSON, having retreated around Townsville, picks up the whole of the Burdekin Shire, taking the small part currently in **KENNEDY**. It also gains the areas of Whitsunday Regional Council in **CAPRICORNIA**, and most of Mackay Regional Council, with the exception of Sarina, which remains in **CAPRICORNIA**.

CAPRICORNIA picks up the whole of Rockhampton City and expands south, picking up both Banana Shire and the northern part of North Burnett Regional Council corresponding to the Eidsvold–Monto SA2 from **FLYNN**. In exchange, part of Isaac Regional Council around Clermont transfers to **MARANOA**, **FLYNN** also sheds Central Highlands Regional Council, the western half around Emerald joining Clermont in **MARANOA**, with the eastern half of Central Highlands transferring into **CAPRICORNIA**.

FLYNN, having shed its inland territory, moves to the coast and is now comprised of only the Gladstone and Bundaberg local government areas, with **HINKLER** moving south, picking up Maryborough and the surrounding area, Cooloola, Kilkivan and Gayndah, **HINKLER** expands as far south as the northern Gympie surrounds to remain within threshold.

MARANOA is now slightly over threshold, and **GROOM** under, so **GROOM** picks up the part of **MARANOA** around Crows Nest, taking most of Toowoomba Regional Council in the north.

Sunshine Coast and northern Brisbane

WIDE BAY keeps Gympie intact and then takes the whole of the Sunshine Coast hinterland west of the Bruce Highway down to Beerwah, along with the Woodford-D'Aguilar area in **LONGMAN** and the whole of Somerset Regional Council, currently in **BLAIR**.

FAIRFAX picks up the whole of Noosa Shire, with the exception of the area west of the Bruce Highway, which transfers instead to **WIDE BAY**; around Eumundi, the dividing line follows the railway line rather than the highway, with that strip also moving west. **FISHER** picks up the whole of the Buderim South and Mountain Creek using the road that becomes Mooloolaba Road as the boundary. The Glasshouse Mountains SA2 also moves from **FISHER** into **LONGMAN**.

LONGMAN, having gained Glasshouse Mountains and lost Woodford, gives up the whole of Narangba to **PETRIE**, along with Dakabin and the part of Kallangur that sits within **LONGMAN**.

PETRIE also takes a small part of **DICKSON**, following Dayboro Road down past Lake Kurwongbah. This serendipitously also includes Old Petrie Town bringing it back within **PETRIE**.

As these changes push **PETRIE** well over threshold, it then pulls its southern boundary back to the Pine River. The area it sheds south of the river is split between **DICKSON** and **LILLEY**,

continuing their existing creek boundary, then the railway line at Carseldine, then the Gympie Arterial Road up to the river.

RYAN picks up Everton Park and Everton Hills, mostly from **LILLEY** and **DICKSON**, along with a small part currently in **BRISBANE**, using Dawson Parade and South Pine Road as the boundary through to the Everton Hills suburb boundary. **RYAN** also picks up Karana Downs from **BLAIR**.

Southern Brisbane and the Gold Coast

The changes to Somerset Regional Council and Karana Downs allow **BLAIR** to expand west and take the whole of Lockyer Valley Regional Council from **WRIGHT**.

OXLEY picks up the whole of Collingwood Park, Redbank Plains and Springfield and Ripley, split along Bundamba Creek and Ripley Road, from **BLAIR**. **OXLEY** also picks up the Greenbank Military Reserve and Forestdale previously in **WRIGHT**, tidying the **OXLEY** boundary.

Now over threshold, **OXLEY** gives up the Centenary suburbs including Sinnamon Park, Jindalee and surrounds to **MORETON**, following Wolston Creek, then the Centenary Motorway, and the Ipswich Motorway. **MORETON** and **RANKIN** then adjust their shared boundary with Algeester and Calamvale moving into **MORETON**, while parts of Runcorn move from **MORETON** into **RANKIN** roughly following the Gateway and Logan Motorway alignment.

MORETON is now over threshold, and sheds electors to **GRIFFITH**, which expands to take in Fairfield, Yeronga and most of Annerley, using Ipswich Road, Cracknell Road and Ekibin Road East as the boundary up to the existing line. **BONNER** picks up Bulimba and Balmoral, using Wynnum Road and Riding Road as the boundary, bringing both **BONNER** and **GRIFFITH** within range. A further adjustment tidies the border around Mount Gravatt, using Gaza Road, Nursery Road, the Mount Gravatt suburb boundary and Pine Mountain Road through to Creek Road. **BOWMAN**, within tolerance and well defined, is left unchanged.

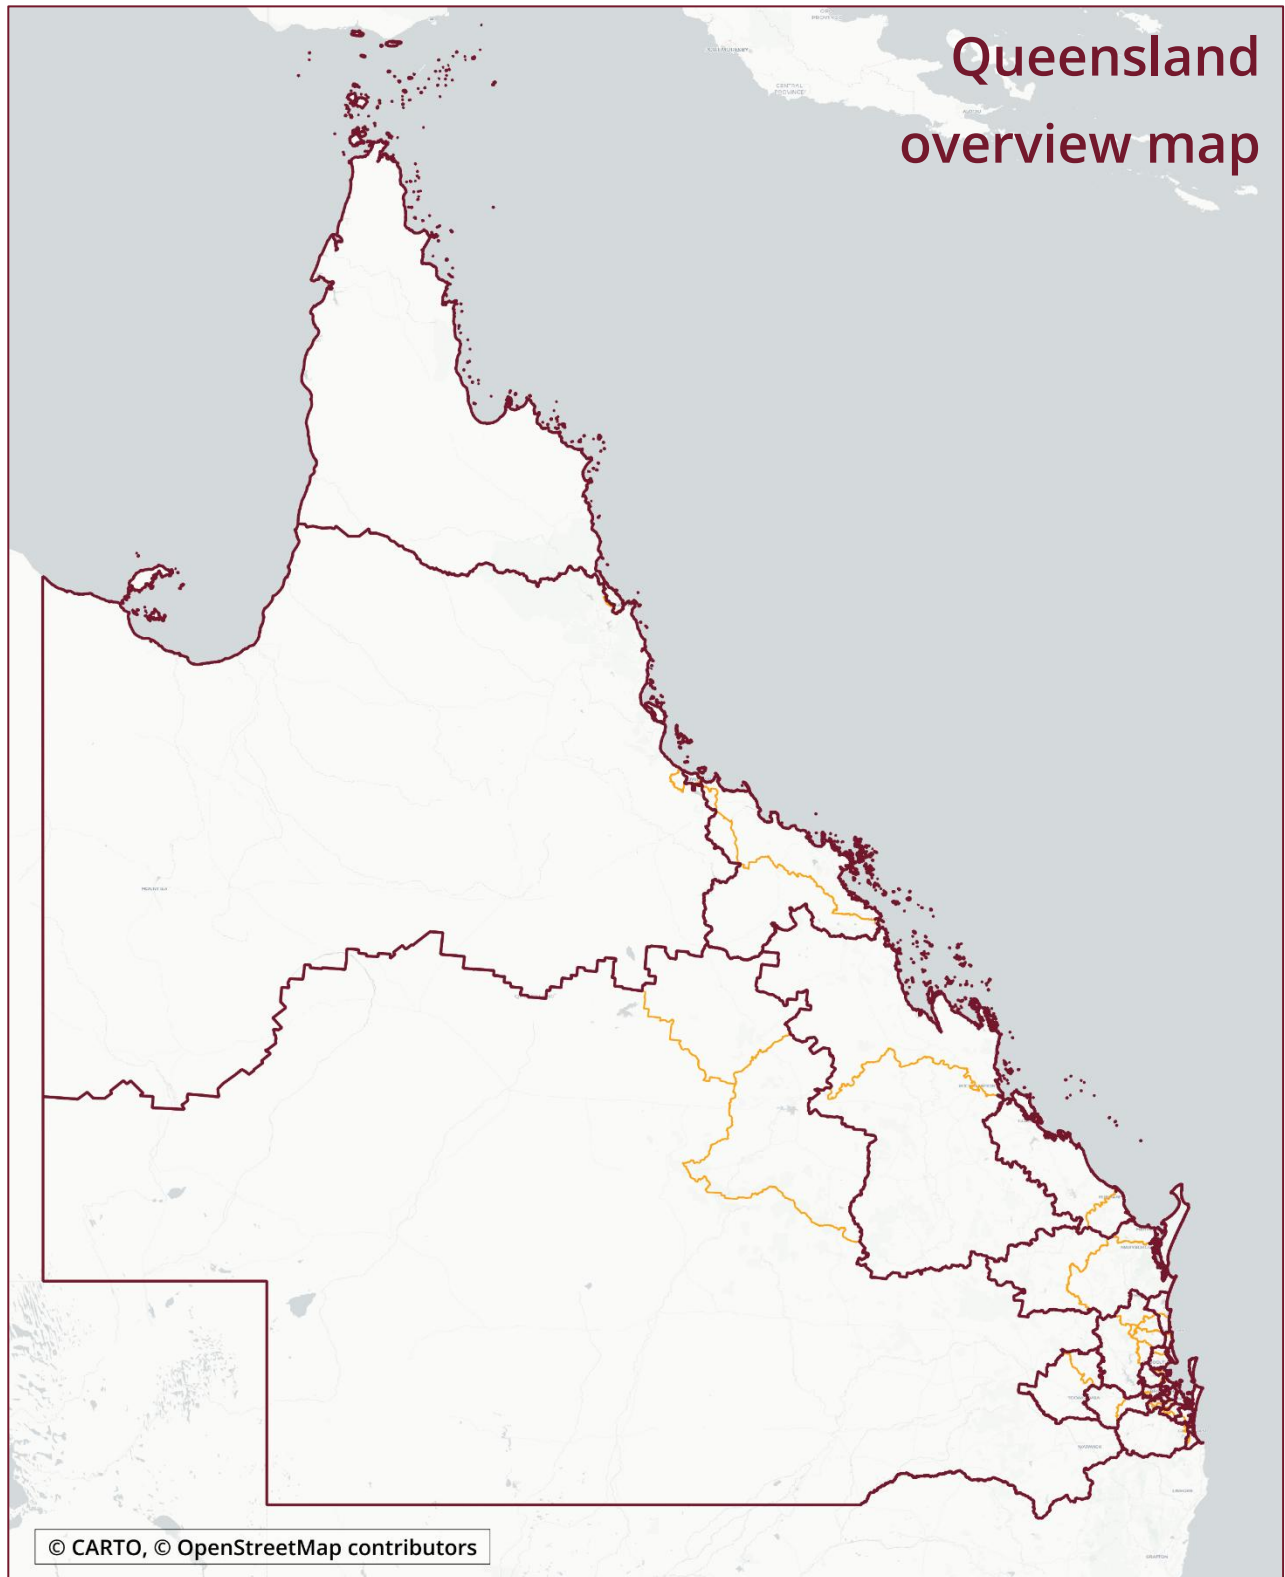

RANKIN's boundary with **FORDE** shifts from the Logan River to follow Scrubby Creek down Loganlea Road, with Slacks Creek moving into **FORDE** and the boundary continuing down Kingston Road past Marsden. **RANKIN** picks up Boronia Heights and Park Ridge. **FORDE** picks up parts of Greenbank and North Maclean, but not South Maclean, along with Logan Village and Yarrabilba, while giving up Upper Coomera, Willow Vale, Pimpama and Ormeau to **FADDEN**.

WRIGHT, having shed the Lockyer Valley to **BLAIR**, picks up Pacific Pines and Oxenford from **FADDEN**, as well as Nerang from **MONCRIEFF**, using the Pacific Motorway as the boundary throughout. **MONCRIEFF**, in turn, picks up Labrador and Parkwood from **FADDEN**. Finally, **McPHERSON** picks up the Carrara/Merrimac area south of Nielsen's Road from **MONCRIEFF**, and the whole of Mudgeeraba from **WRIGHT**, except for a single SA1 using Gold Coast Springbrook Road as a boundary.

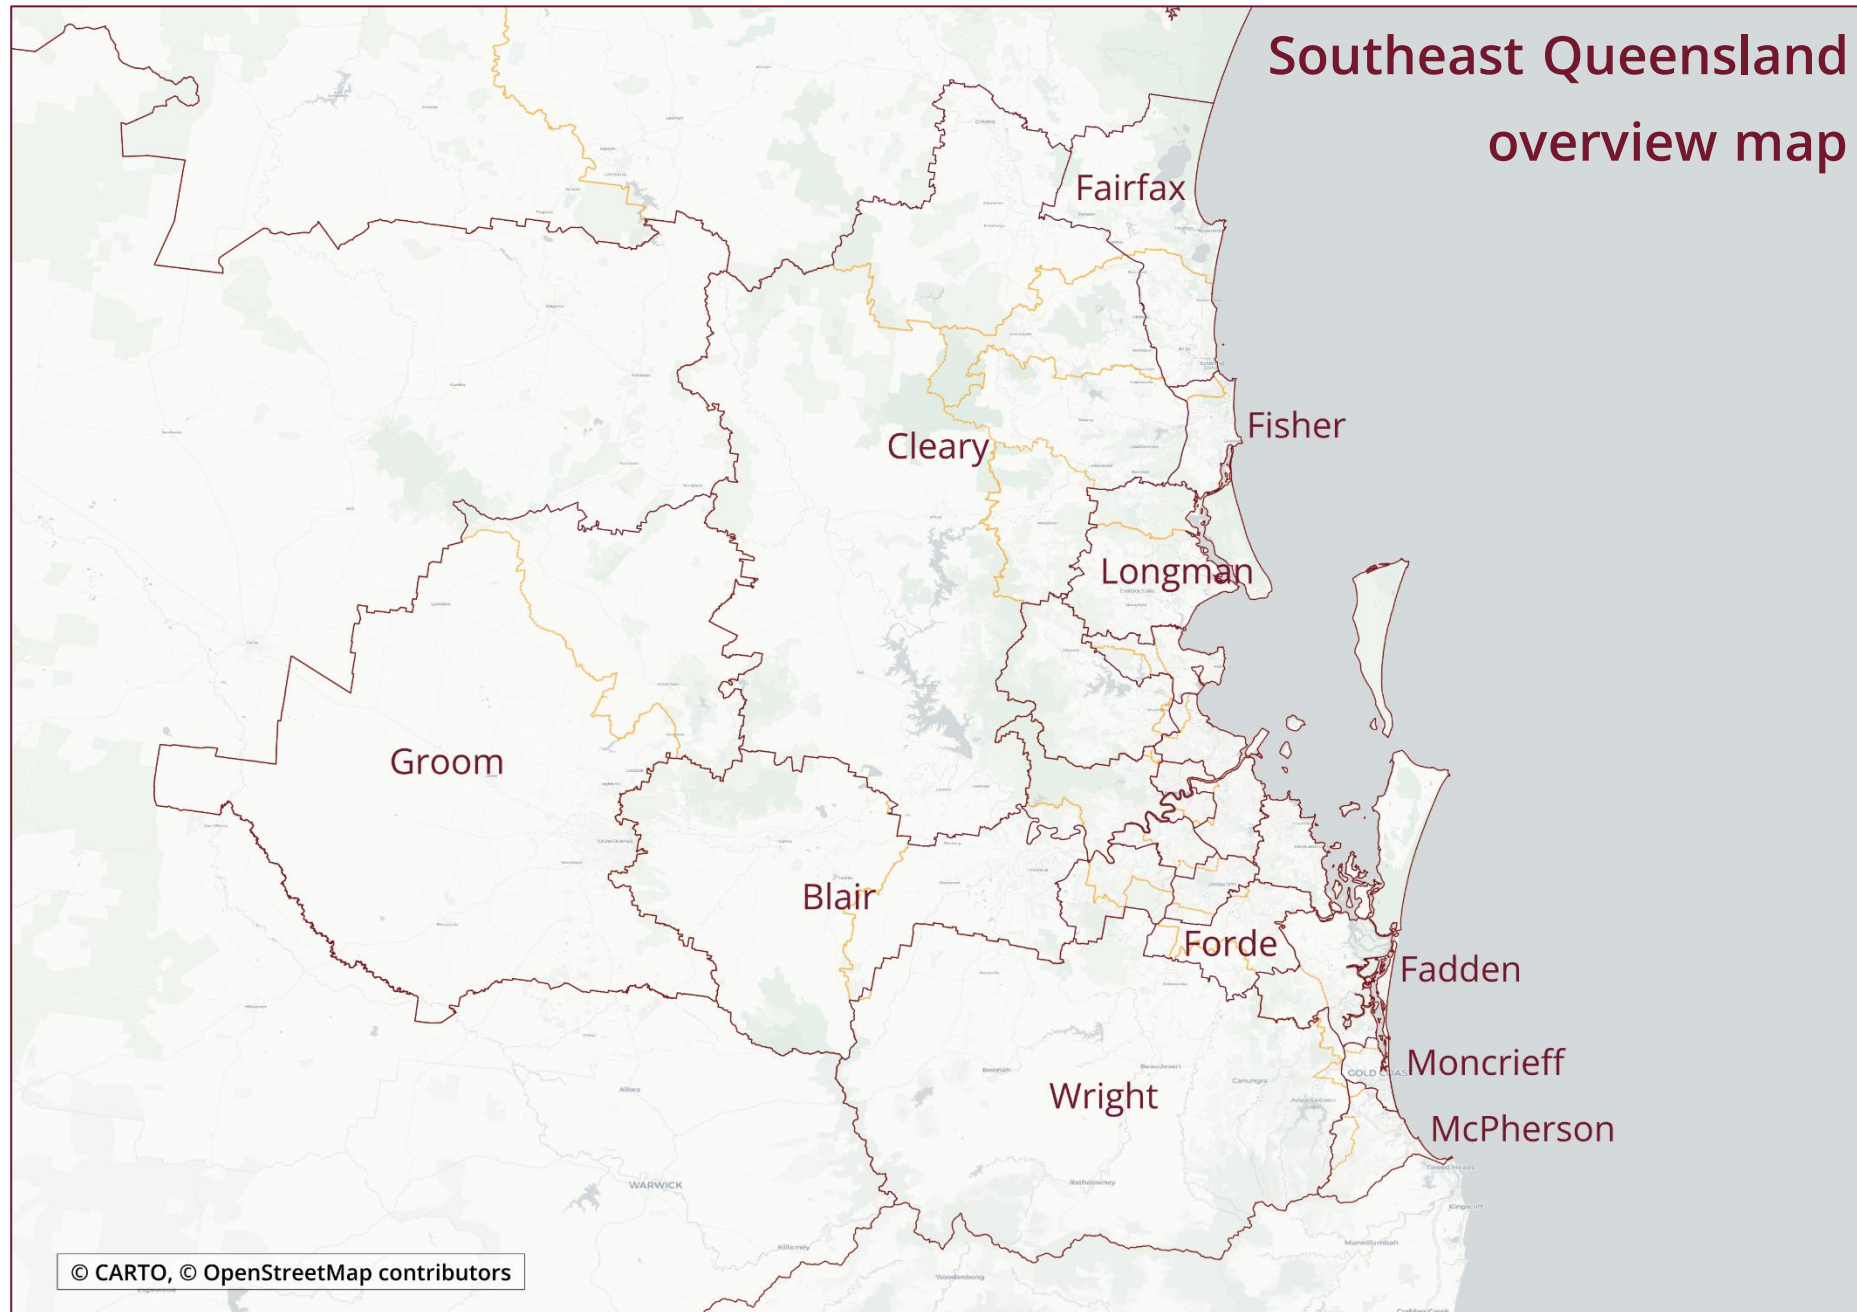

I propose that: The Redistribution Committee adopt boundaries described above for electoral divisions in Queensland.

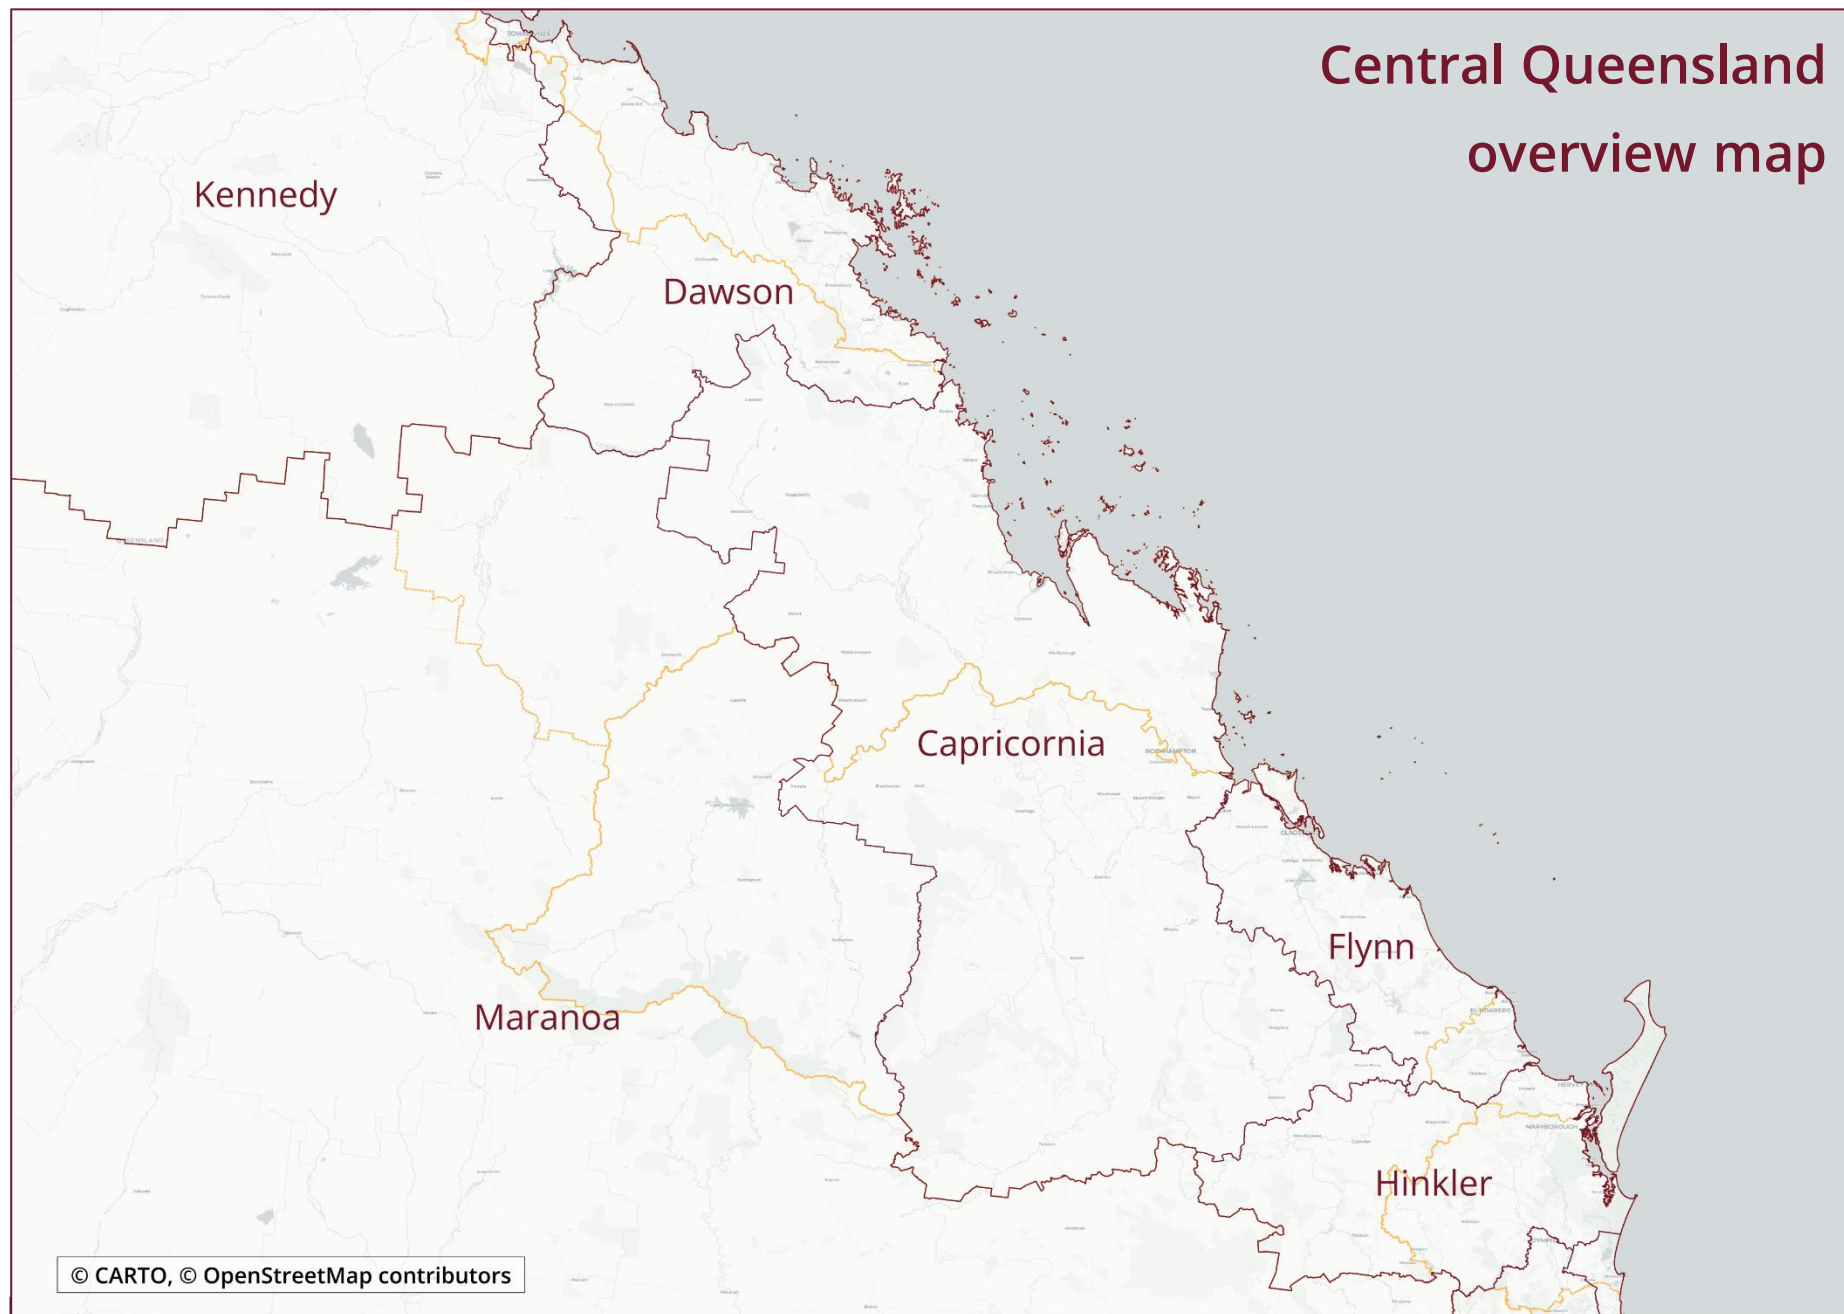

Overview maps

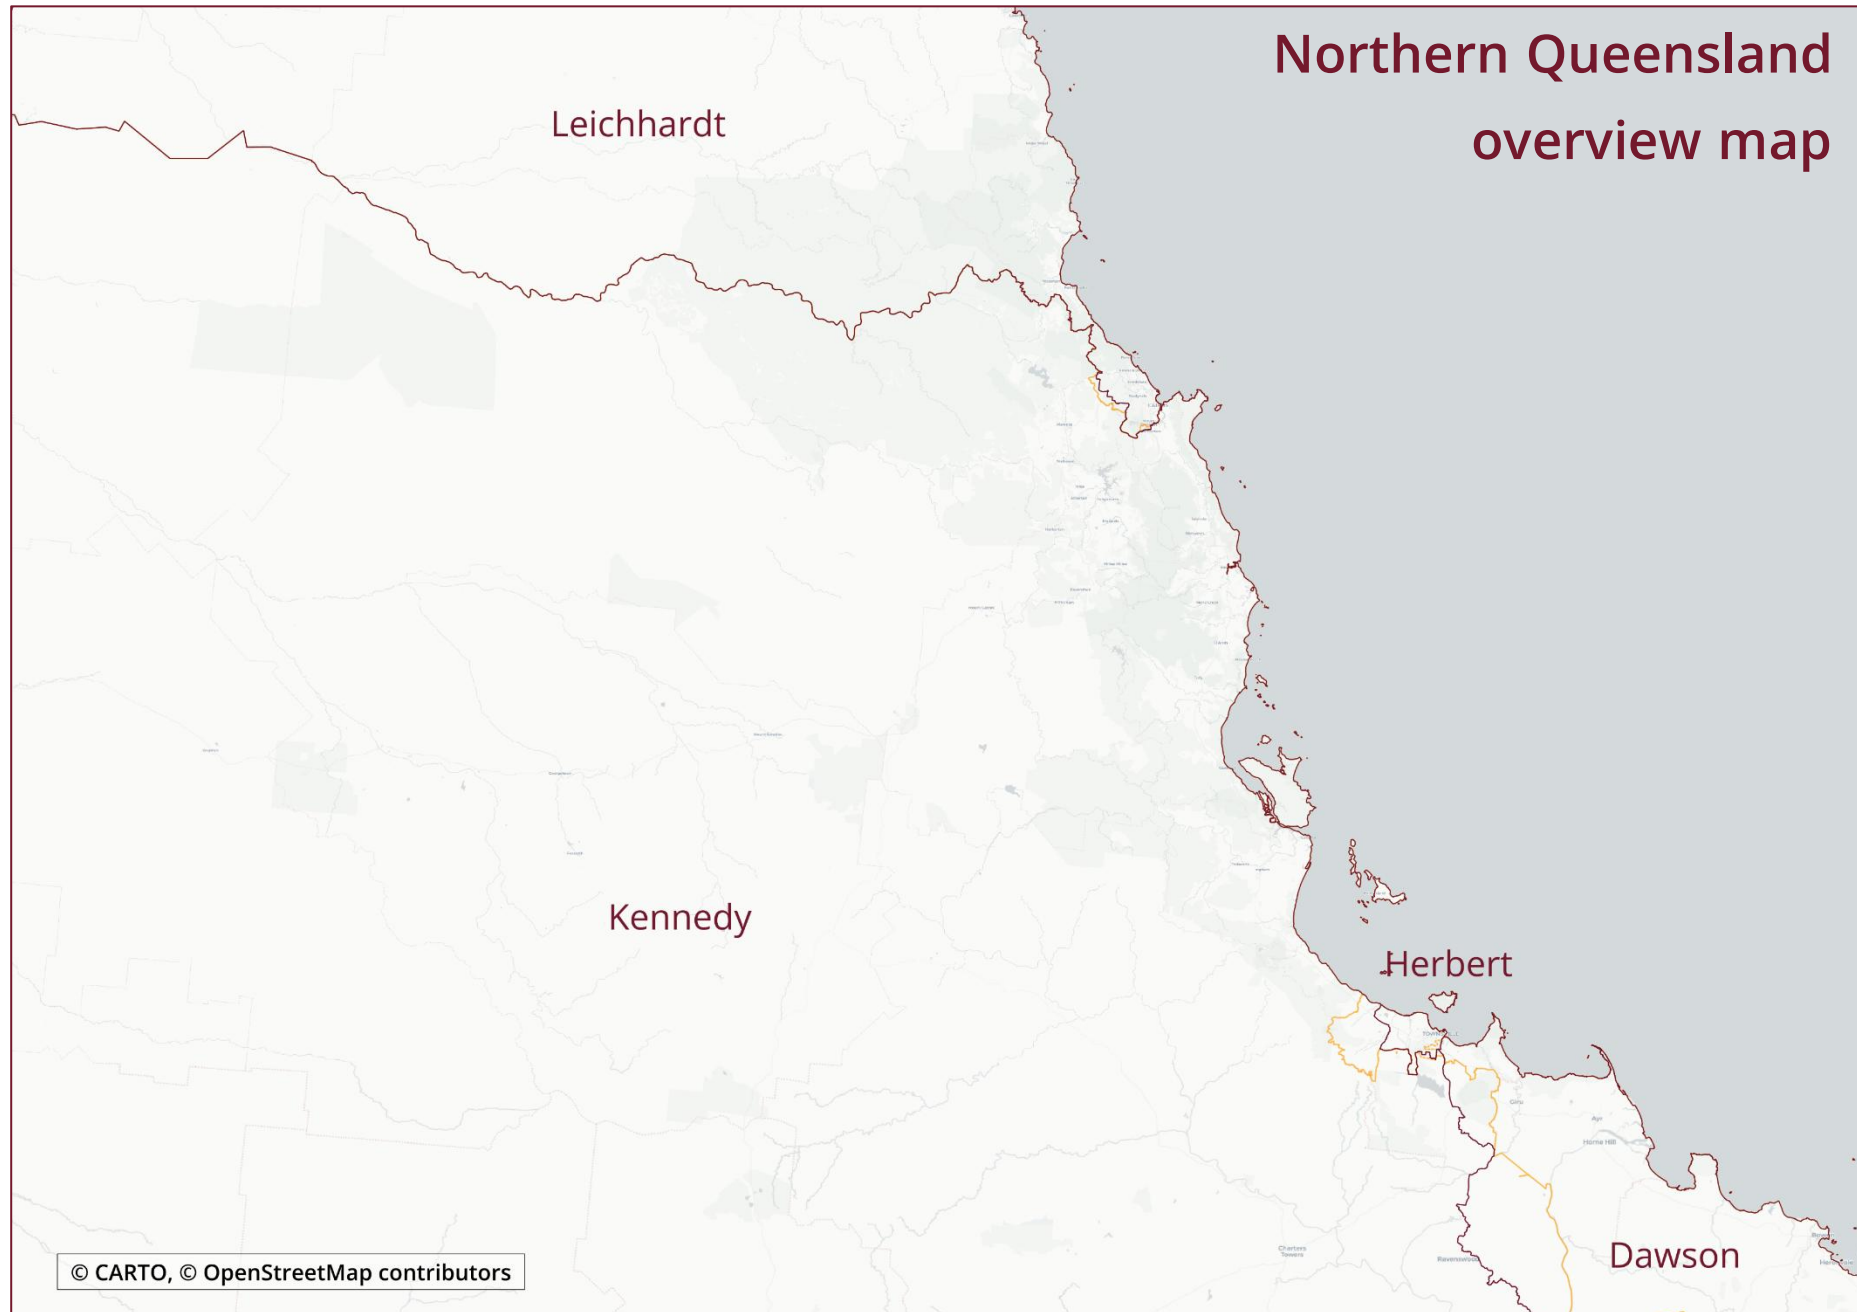

This suggestion, including an online interactive map, can be viewed online at: <https://divs.au/qld/>

Enrolment data for each electoral division

Each division is listed separately with a table outlining the actual and projected enrolment, by SA2 names. Each table in order, lists all electors retained in the division, and then describes the transfer into the division by alphabetical order of existing division name, and then out of the division in alphabetical order by new division name.

A description of the changes to the division boundary follows both tables, proceeding in a clockwise manner using geographic features or infrastructure to describe the boundary where possible.

Blair

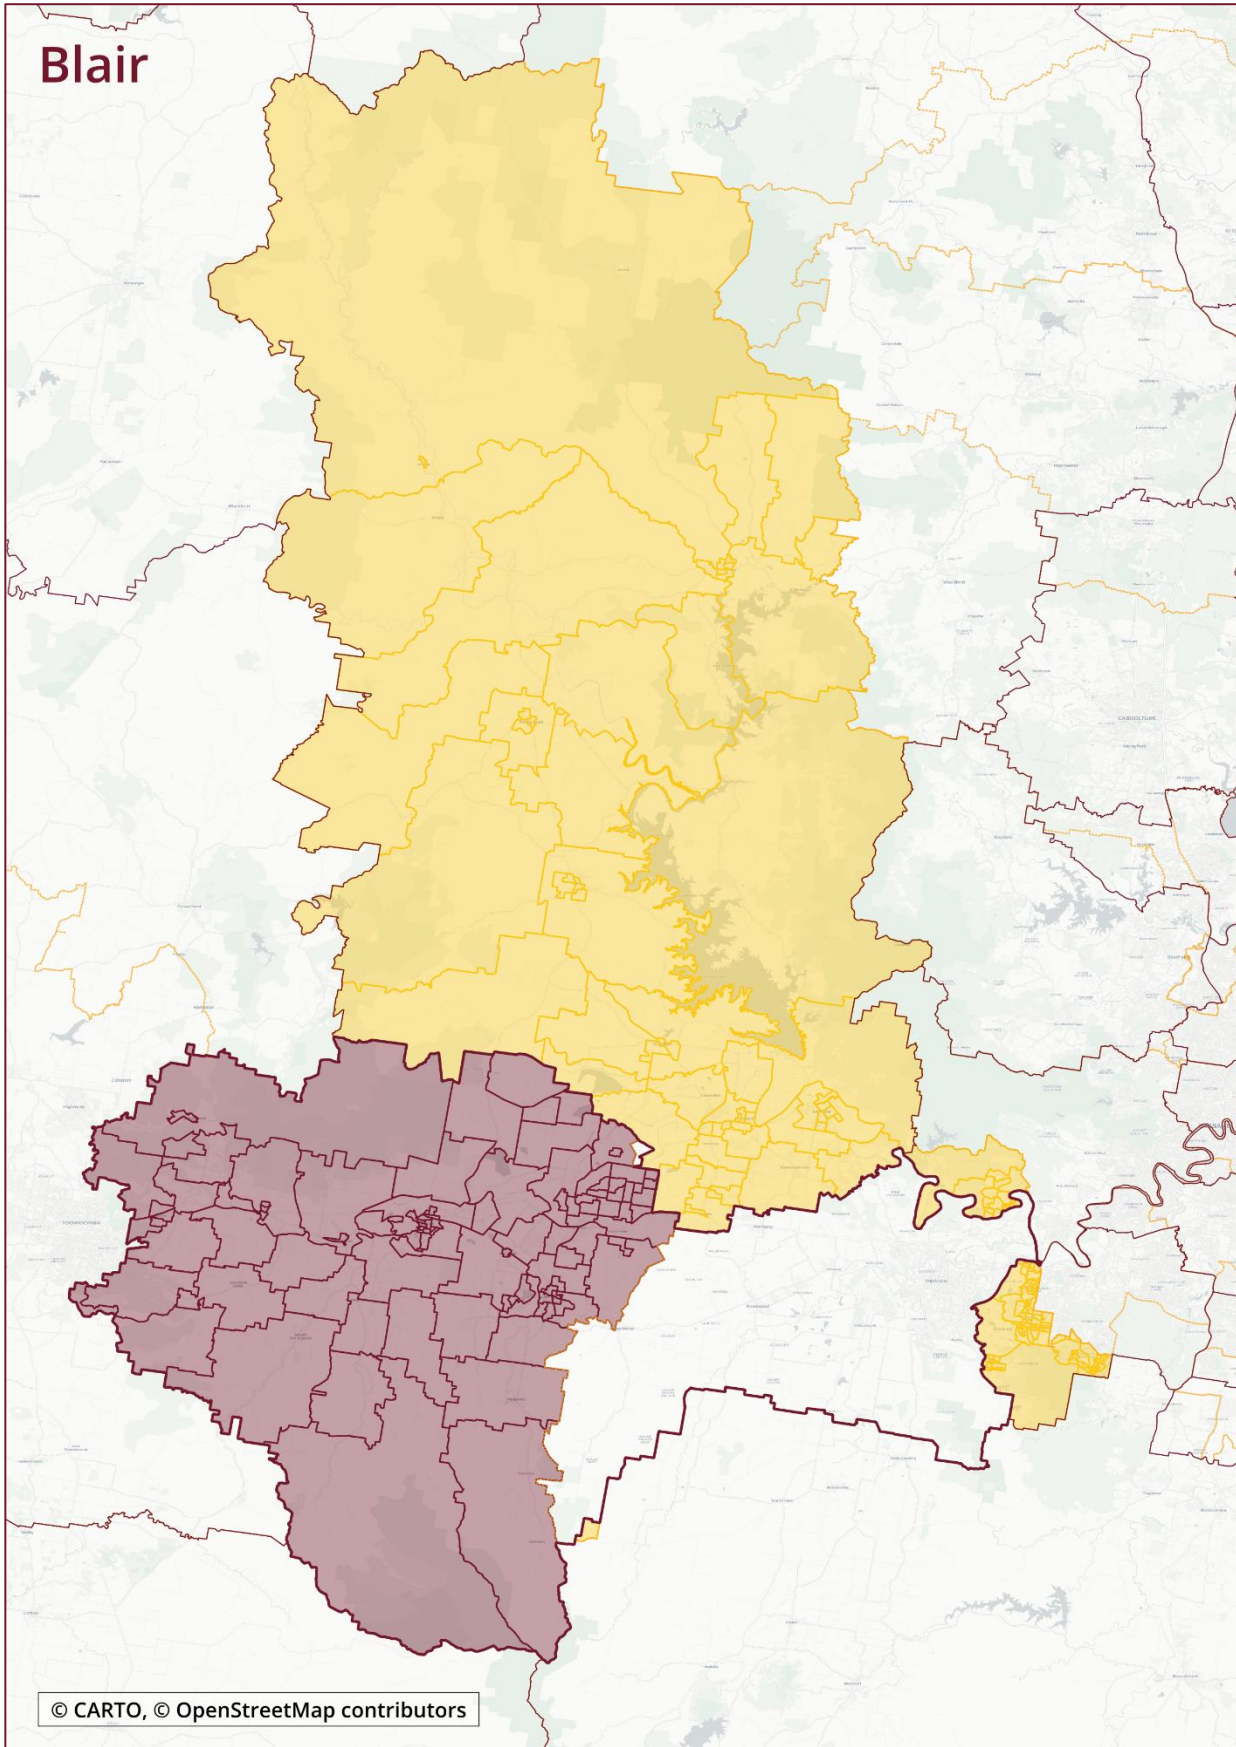

SA2 Name	Actual Enrolment	Projected Enrolment	Num of SA1s
Retained from existing Blair	95,345	100,895	304
Boonah	3	3	1
Brassall	9,186	9,575	32

Boundary Description

From the exiting division boundary with **MARANOVA** follow:

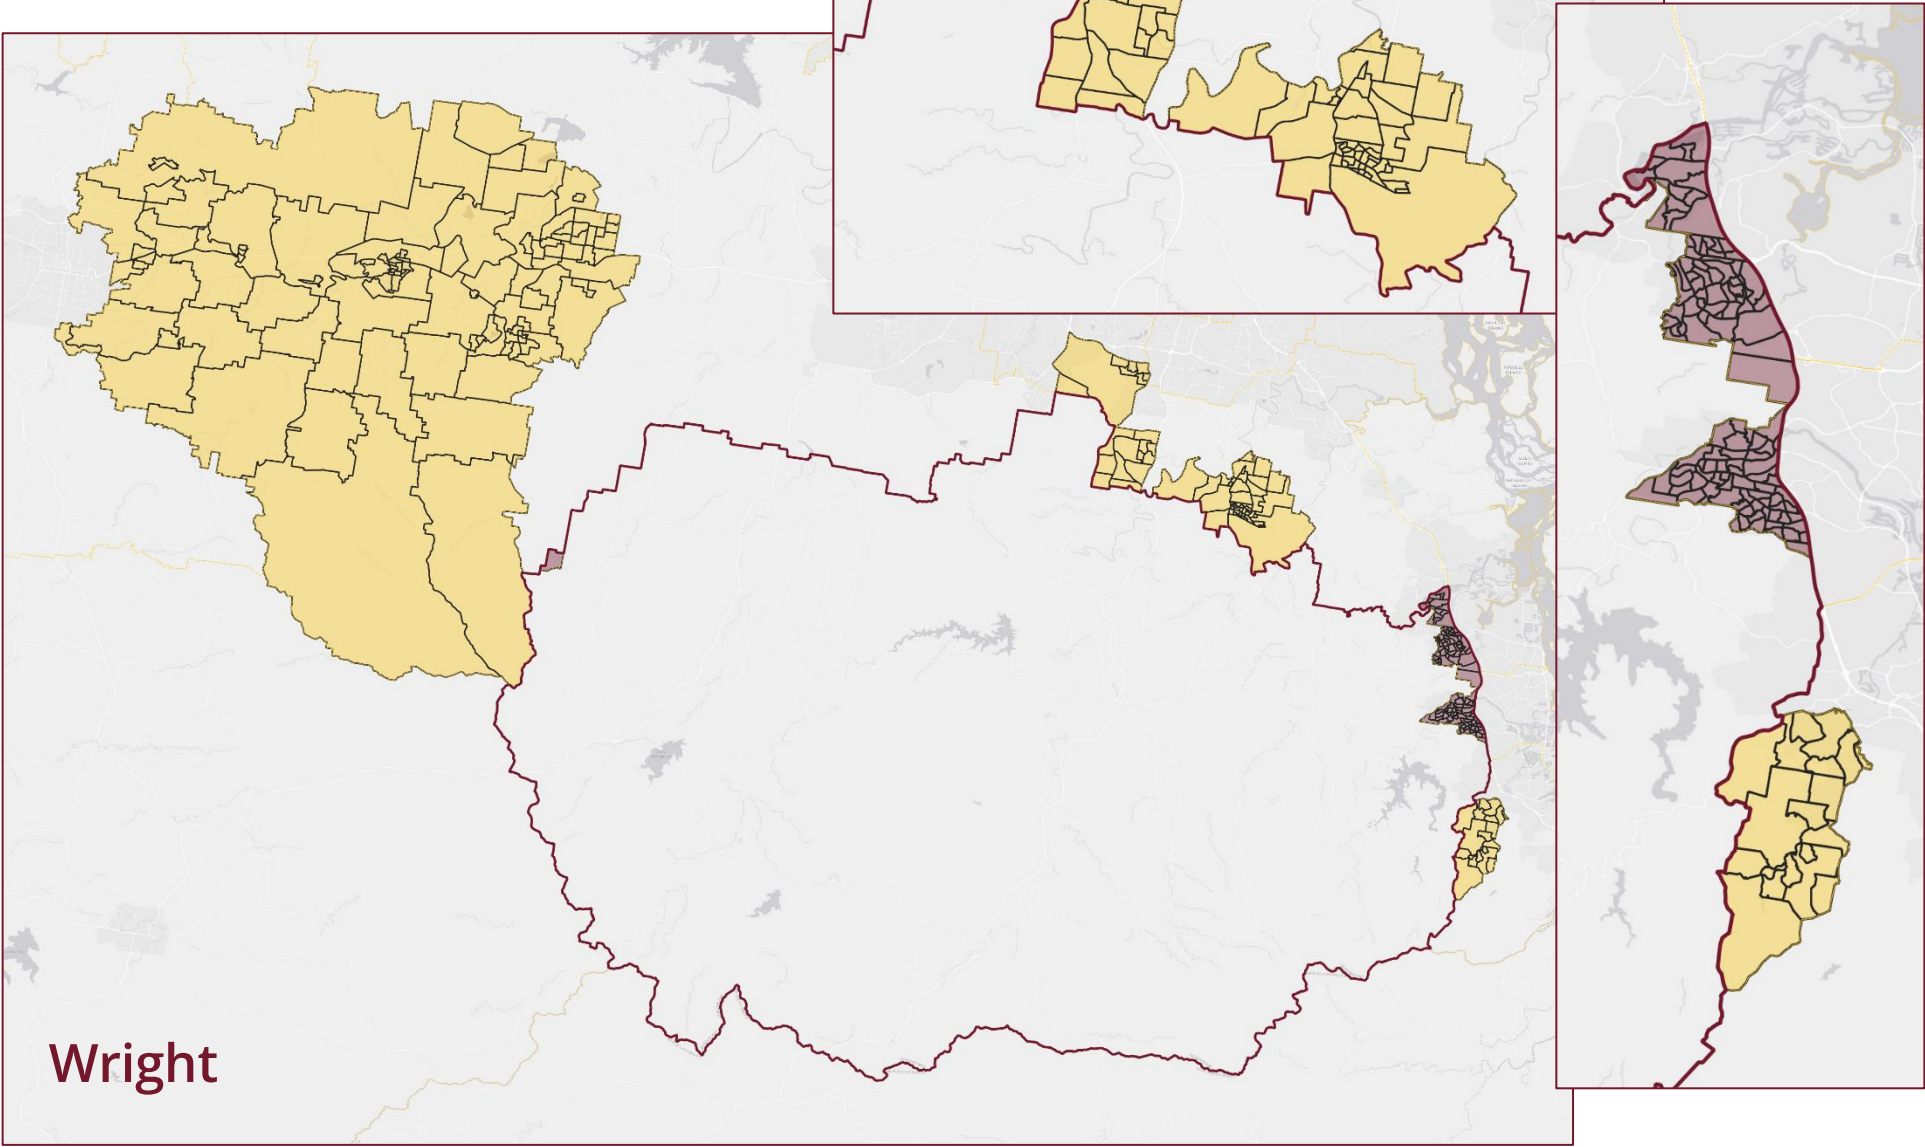

- Scenic Rim LGA boundary
- Ipswich LGA boundary

To the existing boundary with **BLAIR**.

From the exiting division boundary with **OXLEY** follow:

- Springfield Greenbank Arterial
- Goodna Road
- Old Greenbank Road
- Middle Road
- Sheppards Road
- Brisbane to Sydney railway line
- South Maclean locality boundary
- Jimboomba locality boundary
- Tamborine locality boundary
- Waterford Tamborine Road
- Albert River
- Scenic Rim LGA boundary
- Tambourine Creek
- Wongawallan Creek
- Coomera River
- Pacific Motorway
- Mudgeeraba Road
- Old Coach Road
- Tallai locality boundary
- Wallandra Road
- Berrigans Road
- Gold Coast Springbrook Road
- Neranwood locality boundary
- Austinville locality boundary

To the existing boundary with **McPHERSON**.

Wright

List of SA1 codes in new divisions

The following table is a list of all SA1 codes proposed to change divisions in this suggestion.

SA1 codes that are to be split appear with a hatched ochre background. This includes any SA1 where a proposed division boundary along a geographic feature or infrastructure (such as a road or motorway) does not align exactly with the SA1 boundary. This may therefore be a very minor split involving the transfer of no electors.

SA1 Code	Existing Division	Proposed Division
301031017 - Murarrie		
30103101702	From Griffith	To Bonner
30103101703	From Griffith	To Bonner
